

**FOR IMMEDIATE RELEASE**

**“Gallium Visual Systems Inc. selected by Community College of Beaver County as their Air Traffic Control Simulator provider”**

**OTTAWA, ONTARIO, April 17, 2008,** The Community College of Beaver County (CCBC), Beaver Falls, Pennsylvania has awarded the contract to Gallium Visual Systems Inc. to provide advanced Air Traffic Control (ATC) simulation upgrades to both their Terminal and En Route Radar labs.

Gallium’s I-SIM technology manages the full range of ATC training requirements. Their innovative solution meets unique collegiate requirements supporting both Display System Replacement (DSR) and Common ARTS emulation. I-SIM also enables research therefore opening up potential alternative revenue streams for CTI colleges.

“CCBC required a high fidelity simulation solution that would provide enhancements and flexibility. Gallium has the proven expertise and experience in supporting the collegiate ATC market and the capability to enable us to migrate to future systems.” said Jim Scott, ATC Program Coordinator at CCBC.

“We understand the demands of ATC training requirements,” stated Ranald McGillis, Gallium’s President and Chief Executive Officer. “I-SIM is scalable and flexible, supporting the full range of ATC training – from orientation to basic skills. CCBC has selected a forward-thinking technology that will enhance their training capabilities for the long-term.”

I-SIM is platform-independent so it protects previous technology investments. I-SIM can be used for air traffic controller training, human-systems interface design, airspace redesign and validation as well as airport operations design. The I-SIM product family solution makes research possible resulting in potential revenue growth for CTI schools.

## About CCBC

CCBC has been a training innovator of air traffic controllers for 30 years and is consistently rated among the top CTI schools in the United States. The school offers Terminal, Enroute as well as active Tower training for our students. Due to the schools approach of “hands-on experiential” training our students are highly regarded at their respective facilities.

## About Gallium Visual Systems Inc.

Gallium Visual Systems has spent over twenty years building their reputation as a premier provider of commercial off the shelf (COTS) software for performance-critical display applications in Air Traffic Management and Defence. Operating as a subsidiary of leading international defence firm Kongsberg Defence & Aerospace (KDA), Gallium’s software is used in more than 100 defence and security applications around the globe.
