

“Gallium Visual Systems Launches InterWORX”

OTTAWA, ONTARIO, September 16, 2008 - Gallium Visual Systems is pleased to announce the launch of the Gallium InterWORX software development product suite. InterWORX provides a COTS solution for the integration of performance critical distributed real-time systems and delivery of high-performance user interfaces. The InterWORX Product Suite includes InterMAPhics, our high performance geospatial application development SDK and Gallium InterCOM open-standard Data Distribution Service (DDS) for real-time data integration. Now, with InterWORX, system developers can get a proven, end to end, multiplatform development solution for performance critical applications all in a single package.

InterCOM DDS is based on fifteen years of middleware focused software research and development. This publish and subscribe middleware implementation has been used as the real-time data distribution backbone for systems around the world including operational air defense, command and control and naval combat systems.

InterMAPhics has been deployed on over 100 mission-critical applications around the world. Gallium’s solutions for geospatial display management have proven successful in key aerospace, defense and security applications in addition to critical systems for commercial aviation and air traffic control.

The combined power of the InterWORX products allow developers to quickly build high performance geospatial displays and easily share real-time data across systems, networks, platforms and processors.

“The InterWORX product suite is a key part of our commitment to providing developers of mission critical systems with high performance software solutions. We are continuing to invest in this area and work with our customers to extend the value of the InterWORX product suite,” stated Ted Shuter, Product Manager.

About Gallium

Gallium Visual Systems Inc. - a wholly owned subsidiary of Kongsberg Defence & Aerospace – has pursued and achieved the goal of excellence in COTS software for performance-critical systems. Process-oriented and customer-focused, Gallium is registered to the ISO 9001 standard.
