

FOR IMMEDIATE RELEASE

“Gallium Visual Systems Launches InterVIEW”

OTTAWA, ONTARIO, January 21, 2009 - Gallium Visual Systems announces the release of InterVIEW, a high performance, geospatial application for situational awareness displays. This optimized software provides developers of mission critical command and control systems with a modern geospatial user application that includes a set of common operator interface functions.

Built using Gallium’s high performance InterMAPhics display rendering technology and following key industry standards the InterVIEW application is a Commercial Off The Shelf/Non Development Item (COTS/NDI) that supports Transmission Control Protocol/User Datagram Protocol (TCP/UDP) transport as well as Object Management Group (OMG) compliant DDS communication protocols.

“Unlike generic GIS software and mapping tools that require significant upfront development investment, InterVIEW deploys easily and integrates with your data quickly. This gives project and program managers more options when prototyping or building mission critical user interfaces.” stated Ted Shuter, Product Manager.

Gallium has provided the software technology needed to ensure that over 100 mission critical aerospace, defense and security applications have been deployed with responsive, high performance user interfaces. To learn more about InterVIEW or schedule a demo please call us at 1-800-267-2626.

About Gallium

Gallium Visual Systems Inc. - a wholly owned subsidiary of Kongsberg Defence & Aerospace –delivers COTS software for mission-critical systems. Process-oriented and customer-focused, Gallium is registered to the ISO 9001 standard.

About Kongsberg Defence & Aerospace

Kongsberg Defence & Aerospace's operations are directed at the defence and aerospace markets. Their anti-ship missiles, command and weapons control systems, and communication systems have proven competitive on the export market. Alliances with major foreign defence enterprises are a key part of the business area's international marketing strategy.
